FOCUS

ON QUALITY

Ladies and Gentlemen,

As **SGP Group**, we offer a versatile range of services, and our offer has been composed to meet the needs of companies from various industries. We draw on our extensive experience gained both in the Polish market and abroad. By responding to the needs of the market, we gradually expanded our offer to be able to provide our clients with the possibly comprehensive service.

Although, starting in 2006, we operated mainly locally in our hometown of Częstochowa, we quickly became present in other cities in Poland. Also, we did not have to wait long for success in the European market, which accelerated our decision to expand our offer with additional services. Currently, we are a company with a European reach, operating in 12 European countries.

SGP GROUP consists of companies with various business profiles.

SGP - SORTING GROUP POLAND - Sorting, selection, repair of details and finished products

SGP APT - Temporary Employment Agency

SGP QUALITY LAB - Quality Engineering Center

HUMAN & HUNTER PROFESSIONAL - Recruitment and Personnel Consulting

SGP - TRAINING & CONSULTING - Organization of Training and Audits

H&H - Employee Outsourcing, Temporary Work

SAVE&CARE - Sale of Occupational Health and Safety and Cleaning Products

SGP MEDIA - Event Organization and Business Marketing

The main objective that we pursue is to take care of our clients in every possible aspect. By deciding to cooperate with SGP Group, our clients gain not only support in terms of external quality control but also in providing temporary staff, employee training, customer service, event organization, or OHS product sale. All our companies strive together to reach one goal, which gives us strength and drive to operate.

The safety and quality of our services is guaranteed by the **Quality Management Certificate according to ISO 9001:2015**. While focusing on constantly improving the quality of services offered and expanding our offer, we do not forget about the people around us. We demonstrate this through charitable activities (among others, participation in the "**Noble Gift**" campaign since 2014), involvement in actions promoting a healthy lifestyle, as well as participation in important Automotive industry events in Poland and abroad. In 2013, we became the titular sponsor of the Włókniarz Częstochowa stadium, due to which it was named the **SGP Arena Częstochowa**. As part of the society in which we live, we strive to actively participate in social life and share our passion with others.

I invite you to cooperate

Mariusz Puto

President of the Management Board of SGP Group

Why is it worth cooperating with us?

The Service of Resident

SGP Group provides the service of **Resident** that operates on behalf of our clients. It responds immediately and solves any arising quality challenges.

Real-time response to problems • Verification and analysis of the service process
Contact with suppliers • Participation in regular meetings • Maintaining good relations with employees

Our experience proves that we can offer the service of Resident worldwide.

Great Britain: Sunderland, Swindon, Woking, Solihull,
Czech Republic: Kolin, Liberec, Praha, Brandys nad Labem,
Slovakia: Lozorno **Serbia:** Kragujevac, **Romania:** Fagaras,
Italy: Cassino, Ciri, **Hungary:** Ból, Kecskemet, Estergom,
Germany: Ingolstadt **Slovenia:** Novo, Mesto, **China:**

Poznań, Wrocław, Tychy, **Macedonia, Turkey, Ukraine.**

Modern technology within your reach

Our warehouses are located in Europe:

Arad (Romania), Bánovce nad Bebravou (Slovakia),
Birchwood (United Kingdom), Bielsko-Biała (Poland), Łódź
(Poland), Wrocław (Poland)

To expand the scope of services provided by **SGP - Sorting Group**, a new production-warehouse facility was established in 2018, enabling the performance of control and measurement as well as warehouse and logistics services. In the warehouse, located in the Katowice Special Economic Zone in Częstochowa, there are modern devices that streamline the course of work.

CSL II Service

Product control according to Control Shipping Level 2

Product inspection according to the Control Shipping Level 2 procedure is a service consisting in 100% visual inspection of the product (sometimes using inspection and measurement tools), it is performed to eliminate a defect in the supplier's product in the event of inconsistent or qualitatively inadequate deliveries.

This control ensures that the final recipient receives deliveries that meet the requirements. As part of this service, the client receives technical support necessary in relations with the supplier to analyze and solve the quality problem.

We can perform CSL II quality control at the client's premises, at the supplier's, in our warehouse, or at another individually agreed location. We have extensive infrastructure that allows us to provide high-quality services.vv

TEMPORARY EMPLOYMENT

„ We are an employment agency that provides modern services in temporary employment, outsourcing, and recruitment. We support our clients in recruiting employees, flexibly responding to changes in the job market. ”

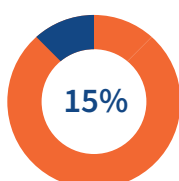

About SGP APT

Many years of experience based on cooperation with representatives of the automotive, logistics, production and industrial sectors as well as a large database of job candidates allow us to quickly and effectively provide temporary employees. We are always guided by the individual needs of our clients. We approach each order in an individual, reliable and professional manner. We are able to provide from a few to even several dozen employees for a specific position. By cooperating with us, the client can be sure that they will get suitably qualified employees. **SGP APT** deals with all personnel and administrative issues. As a Temporary Employment Agency, it provides employees with continuous substantive support as well as appropriate training for work. It is an ideal solution for companies that need to temporarily expand their team in the event of increased production or employee absenteeism.

QUALITY CONTROL

„SGP Quality Lab – a new brand of **SGP Group** – established in 2018. It fits perfectly with the changes brought about by the concept of Industry 4.0. The modern machines and devices used by us support design, quality, and engineering processes.”

About SGP Quality

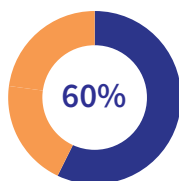

SGP Quality Lab is a brand that was established in response to the requests of our clients. It is located in the SGP Quality and Engineering Center within the Katowice Special Economic Zone in Częstochowa. The strategic location of SGP Quality Lab near the A1 motorway provides excellent communication with the entire Poland. Thanks to cooperation with SGP Quality Lab, the client always receives quick and effective solutions to quality and engineering problems that they encounter during the implementation of their own projects. In every aspect of our activities, we strive for excellence, supporting the ongoing production of our clients.

We have an industrial X-ray cabin, Phoenix X|Cube, for real-time 2D inspections with the option of a 3D tomograph, which is used during inspections of castings, parts, and subassemblies in industries, e.g., automotive and aviation. We serve customers from various industries with an urgent need for a quick and effective X-ray inspection without damaging details.

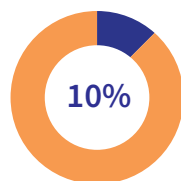

SGP Quality Lab deals with the analysis of details according to strict rules established with the client, complaint analysis, development and manufacture of measurement tools, development of documentation (drawings, material specifications), quality control, detail repair, simple assembly, development and execution of prototypes in 3D printing, development and manufacture of casting molds.

In addition, we have our own warehouse space and transport, due to which we provide the customer with smooth deliveries. We carry out both visual inspections and those using X-ray control and measurement tools. **SGP Quality Lab** has modern equipment and uses the latest technologies to provide professional service of tasks commissioned.

X-ray System

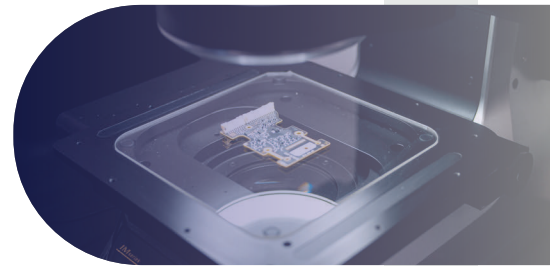

X-ray technology (digital radiography) is widely used for inspecting manufactured parts. Thanks to this method, it is possible to examine the interior of the detail without the need to disassemble it.

The image created as a result of this examination is each time adjusted using special filters to highlight and as far as possible identify the problematic area of the detail. Any possible imperfections found during the X-ray can also be measured with high accuracy.

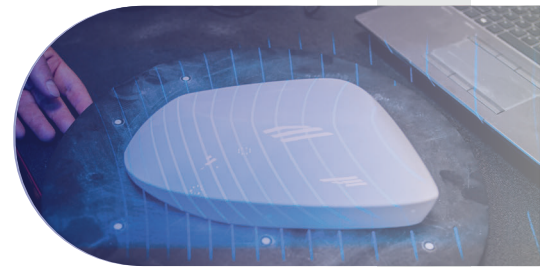

Digital serial control

The measurement projector allows for performing quickly the accurate measurement of specific parameters of the detail. By combining microscope, computer, and projector functions, we create a program that automatically verifies the indicated areas, classifying the detail as either compliant or non-compliant. This program is created based on data transferred directly from the drawing of the detail provided by the client.

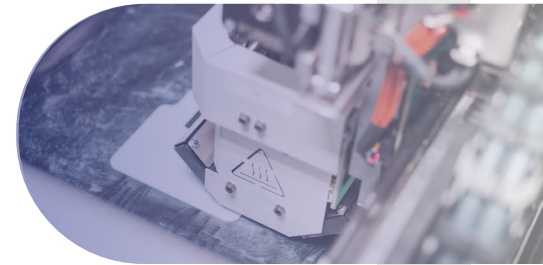

3D scanning

3D scanning is a modern technology consisting in collecting the coordinates of points from the space of the examined detail by a 3D scanner. In this way, a point cloud is created, due to which more accurate quality control is possible. Using special software, a 3D model of the MESH detail can also be created.

3D printing

3D printing is a method of manufacturing details from plastics, metals, composites, and many other materials, i.e., layer by layer. 3D printing is an excellent solution at the stage of prototyping as it constitutes a faster alternative to other popular production methods. We offer a range of 3D printing technologies, including FDM, SLA, SLS, DMLS, 3SP, DLP, and PolyJet.

Complaint analysis

Complaint analysis enables the comprehensive interpretation of the inspected detail. It is supported by computed tomography, modern DR technologies, and 3D scanning. By using non-destructive testing, we are able to examine the internal structure of the detail, identify any irregularities, and measure them based on the drawings provided by the client.

HEALTH AND SELF CARE FOR INDUSTRY

„SGP Group has expanded its portfolio with a new **Save Care** brand, the task of which is to improve safety and comfort at work by supplying companies, wholesale and individual customers with articles from the OHS industry.”

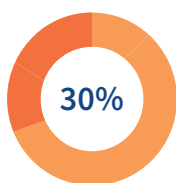

About Save Care

The main premise behind the establishment of **Save Care** was the desire to improve the safety and comfort of employees' work. Based on many years of cooperation with manufacturing industries, especially with the automotive industry, there was a need to expand the offer with the sale of workwear, clothes, footwear, personal protective equipment and many other health and safety products. We offer professional work clothes, protective shoes, aprons, outerwear, headgear, articles for respiratory, hearing and eye protection. Our offer includes a wide selection of effective cleaning agents and fall protection equipment. Our goal is to provide individual and wholesale customers with the highest quality protective products. We do not focus only on sales, for us it is important to provide appropriate and professional advice when choosing the appropriate health and safety products.

OUR IMPLEMENTED PROJECTS

Sports events

Our original Work Life Balance project inspired participants to seek balance in life through practicing sports. Each edition of WLB was held with the participation of Ewa Chodakowska, with whom we also organized Be Active Tour training. We practiced in Częstochowa, Poznań, Katowice, Kraków, Wrocław and London.

The beginning of the speedway season

We were the organizer of the ForBET Włóknarz Częstochowa 2019 Team Presentation at the HSC Sports Hall in Częstochowa. The highlight of the evening was the performance of the Akcent band, and the event was attended by nearly 7,000 participants. In 2020, we again participated in the organization of this event, having the opportunity to cooperate, among others, with Patrycja Markowska and her band.

Integration and

We organized both a corporate Christmas Eve inspired by film aesthetics, as well as we undertook to prepare the anniversary celebration of an international company. We prepare intimate team building events and grand galas with hundreds or even thousands of guests.

Celebrating an investment

A grand event which is the culmination of a serious business investment is an excellent PR procedure. We had the pleasure of organizing an event attended by 1200 people, celebrating the opening of a new warehouse that marked the beginning of the future success of our international client.

Outdoor events

A family picnic for employees or a mass event on the occasion of Children's Day. We are perfectly prepared to organize the so-called Cloud events. Always flexible, ready for changing weather conditions and committed to the last minute of the event.

Outdoor advertising

We create professional graphic designs tailored to outdoor advertising media: billboards, citylights or announcement posts

Campaigns in social media

We manage business profiles tailored to the needs of each company. We create advertising campaigns, plan posts, and report on the results of actions taken.
